Please ask about special rate for Waiheke Island residents ...

The Bluegreens

The Bluegreens are the National Party's advisory group on environmental issues. They are committed to exploring environmental policy in areas such as biosecurity, conservation and outdoor recreation, and investigating ways to integrate environmentally-friendly values into mainstream policy-making.

The Bluegreens approach is underpinned by five principles:

- Resource use must be based on sustainability
- Economic growth and improving the environment can and must go hand in hand
- Good science is essential to quality environmental decision making
- People respond best to change when engaged and given incentives
- New Zealanders have a unique birthright to access and enjoy our special places.
